PRODUCT DATA SHEET

UNIVERSAL TRANS 10W/30

PRODUCT DESCRIPTION

Universal Trans 10W/30 is a 10W/30 grade new generation hydraulic/transmission Universal Tractor Transmission Oil (UTTO) designed for a wide range of power-driven agricultural equipment fitted with gears, transmissions, differentials, final drives, hydraulic pumps, hydraulic bearings, wet brakes, and power take-off (PTO) clutches.

Universal Trans 10W/30 application does not end at the farm gate. It will improve performance in many off-road applications, particularly in service which places tough demands on power driven components, including off-highway, construction machinery and industrial equipment. As an added bonus, lubricant inventories can be reduced.

RECOMMENDATIONS

Universal Trans 10W/30 can be used in a large range of equipment such as John Deere, Massey Ferguson, New Holland, Case, Komatsu, Kubota, Volvo, Allison, Caterpillar, Denison, Sperry Vickers, Plessey and Sundstrand.

BENEFITS

REDUCE INVENTORY: Since Universal Trans 10W/30 can replace three or more farm lubricants. This not only simplifies tractor and other farm equipment servicing but avoids possible misapplication of lubricants which may result in damage to vehicle components.

FILTERABILITY Superior to competitive fluids, **Universal Trans 10W/30** overcomes the tendency of filter plugging; particularly where other fluids contain trace moisture contamination. With **Universal Trans 10W/30**, supply of lubricant is assured to all moving surfaces.

IMPROVED EP ANTI-WEAR PERFORMANCE: **Universal Trans 10W/30** gives a long trouble-free service in the high load conditions experienced in transmissions, axles and hydraulic systems.

TRACTOR POWER TAKE-OFF LIFE: Facilitates extension of take-off life because **Universal Trans 10W/30** has the special ability to quickly stall to prevent the clutch from slipping and burning up when a tractor-driven implement hits a large object in the field. **Universal Trans 10W/30** provides faster stall times reducing clutch wear and prolonging PTO life.

BRAKE CHATTER: Results in greater braking difficulty and ultimate premature failure. **Universal Trans 10W/30** suppresses chatter without demerits to braking capacity. The balanced friction control ensures proper functioning of the wet brake and PTO clutches.

SEAL SWELL: Properties of **UNIVERSAL TRANS 10W/30** are especially controlled so that seals, gaskets and wet brake components do not deteriorate, thereby avoiding costly repairs and down time.

ACCEPTABILITY OF UNIVERSAL TRANS 10W/30 TO OEMs

Please contact to the Hi-Tec Oils Technical Department for an extensive list of approvals and recommendations claimable by **Universal Trans 10W/30.**

Hi-Tec suggests that the equipment manufacturers' recommendations for viscosity grade, performance requirements and general operating conditions should be checked prior to use.
