### VYR-39 CINETIC Air Release Valves

#### General properties:

- Simple action kinetic air valves to extract and impel air from irrigation systems.
- Made of nylon 6.6 and reinforced with 30% fibreglass. Rubber closure gasket and polystyrene float.
- Operating range of 0.2 to 15 bar.
- Continuous operation.
- Automatic effect.
- Extracts more than 500 m3/h of air on filling the installation, without the valve closing through absence of air.
- Extraction of more than 45 m3/h of air in installations with hydraulic pressures of 4 bar.
- **It extracts** the air from the installation while the pipelines are filling. When the water reaches the inside of the valve, the float rises and closes the discharge outlet.

#### Applications:

- Agricultural installations, professional landscaping of all types and industrial use.

#### Models:

Ref. 103904: 3/4" simple.

Ref. 103905: 1" simple.

Ref. 103924: 3/4" simple BRASS.

Ref. 103925: 1" simple BRASS.
